

QCP Project Certification Verification

Company Name:

Phone Number:

Email:

Project Name:

Project Date:

We have received your project specifications and would like to thank you for the opportunity to bid and collaborate on this project with your team. We noticed in your specs that you identified the project as being QCP-certified, and we would like to verify with you that you will be enforcing these standards in your project and with all woodworking firms who bid on the project.

The reason we ask this is to ensure we're submitting a bid that compares equally with the bids you'll receive from other woodworking firms, and so we both share a common understanding of the requirements of a QCP-certified project.

Woodworking firms must hold a QCP license in order to work on a QCP-certified project. This means that if non-licensed woodworking firms submit a bid, they must gain QCP licensing in order to fulfill your project.

About QCP-licensed woodworking firms

We are a QCP-licensed woodworking firm. This means we will adhere to the AWS and AWI Standards based on what you specified in your project, which are the standards QCP certifies to. Additionally, we have been through QCP's vetting process, so you can be confident our work will be of the highest quality, and we have the experience of working on multiple QCP-certified projects.

What does QCP project certification involve?

- The project will be inspected and approved by QCP inspectors to ensure the project conforms to industry standards
- The project needs to be certified as either custom or premium grade, according to your quality requirements
- Project certification labels need to be requested and included as a fee in the bids, if required
- It means greater accountability and communication between all stakeholders, both now and throughout the project

Action:

Please reply to our email to confirm your commitment to having this project QCP-certified. ***Thank you!***
